

Press Release

Awareness Event

Venue: Terma Linca, Thimphu Date:28th February, 2023 Time: 3:00 pm - 7:00 pm

To bring attention to social protection issues faced by marginalised groups like people with disabilities, youth recovering from addiction, care-givers and women, BCMD, in partnership with Phensem, RENEW and Bhutan Canada Foundation is organising an Awareness Campaign **#PeopleCenteredPolicy**.

Members of the marginalised groups have undergone a series of Design Thinking workshops with representatives from government agencies to reflect on their situations and deliberate on policy options.

At the Awareness Event, the representatives of the marginalised groups will present their stories of work-place discrimination, inequalities in access to education, information and public services, gender-discrimination, and social reintegration issues. The member will share constructive feedback and make policy recommendations for consideration by concerned agencies.

The Event is in hope to inform policy decisions with lived experiences of the marginalised groups in our efforts to make Bhutan's democracy inclusive of all voices.

This project is supported by the Fund for Innovation and Transformation.
